

UNIVERSITY OF
TORONTO

Genome Biology and Bioinformatics
Collaborative Specialization

Welcome to the Genome Biology & Bioinformatics program! I've recently taken over as director of the GBB program. This is an exciting time to be in genome sciences, with initiatives such as the newly created [Data Sciences Institute](#) at U of T. GBB is an interdisciplinary collaborative graduate program that takes advantage of research strengths in high-throughput, computational and quantitative biology, spanning faculty on all 3 campuses, hospitals and research institutes affiliated with U of T. This is a rapidly growing area, and our graduate program offers the opportunity to meet and interact with a vibrant community of scientists encompassing a wide range of interdisciplinary interests. Feel free to contact me, or Madison Marshall, for more information, or if you are interested in applying!

Professor Belinda Chang

Director, Collaborative Program in Genome Biology and Bioinformatics
